
Software Release Notes

Christie Link version 1.2.1

This document provides the changes from Christie Link version 1.2.0 to 1.2.1.

Affected products

The following products are affected:

- Christie Link

Purpose of release

The primary purpose of this release is to introduce the following feature:

- Added the Aspect Ratio control to support 4K+ products. This control allows the user to switch between 16:9 and 16:10 video formats.

Notes

Note the following about version 1.2.1:

- Upgrading from Christie Link v1.1.0 or older to a newer version invalidates the existing `service` web user interface login; instead, use `user` as the username and `user` as the password. To change the default password, use **MENU > Admin > Remote Password feature**.

Known issues

This release of Christie Link contains the following known issues:

- When using Two Port mode (for example, to achieve 4K120 Hz using two DisplayPort inputs), Christie recommends configuring the source first and then switching to Two Port mode on Christie Link.
- In rare cases, Christie Link HDMI inputs do not decode colors correctly.
Resolution: Remove and reinsert the HDMI input.
