

End-of-production notice

As we continue to create innovative solutions, we discontinue former technology. The introduction of Christie® Real|Laser™ illumination technology for cinema continues to ease the transition from Xenon to RGB pure laser. Christie Real|Laser is an incredibly efficient, performance-driven light source that drastically out-performs any other cinema illumination platform. And the long, stable operational life of these projectors means they provide the lowest total cost of maintenance of any cinema projector in the same class.

On **October 1, 2019**, the Christie® CP42LH reached end-of-production status.

We'll continue to provide support for 10 years from the end-of-production date, until **October 1, 2029**.

Product name	Replacement product
