

END-OF- PRODUCTION

CHRISTIE®

Solaria Series 2 projectors

We continually evaluate market demands to ensure we properly balance product portfolios that accurately address our customer's needs.

As a result, on **March 31, 2023** all remaining Christie® Solaria Series 2 projectors reach end-of-production. We still offer a similar viable solution to meet your needs, outlined below.

We'll continue to provide support for 7 years from the end-of-production date, until **March 31, 2030**, while parts are available, unless the product is covered under a standard or extended warranty, in which case we'll continue to provide support for the applicable warranty period.
