Thank you for purchasing this projector.

⚠️ WARNING ▶ Before using this product, please read all manuals for this product. Be sure to read Safety Guide first. After reading them, store them in a safe place for future reference.

About this manual

Various symbols are used in this manual. The meanings of these symbols are described below.

⚠️ WARNING This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

⚠️ CAUTION This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

NOTICE This entry notices of fear of causing trouble.

📖 Please refer to the pages written following this symbol.

NOTE • The information in this manual is subject to change without notice.
• The illustrations in this manual are for illustrative purposes. They may differ slightly from your projector.
• The manufacturer assumes no responsibility for any errors that may appear in this manual.
• The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Introduction

Features
The projector provides you with the broad use by the following features.

✓ This projector has a variety of I/O ports that supposedly cover for any business scene. The HDMI™ and HDBaseT™ ports can support various image equipment which have digital interface to get clearer pictures on a screen.

✓ This projector can be controlled and monitored via LAN connection. Furthermore, you can use the designated USB wireless adapter (optional) to establish wireless LAN connection.

✓ The built-in 16W speaker can deliver sufficient sound volume in a large space like a classroom without external speakers.

✓ Has an HDCR and an eClarity features which are original image stabilizer for a clearer image.

Checking the contents of package
Please see the Contents of package section in the User’s Manual (concise) which is a book. Your projector should come with the items shown there. Contact your dealer immediately if any items are missing.

⚠️ WARNING ▶ Keep small parts away from children and pets. Take care not to put in the mouth. If swallowed, consult a physician immediately for emergency treatment.

NOTE • Keep the original packing materials, for future reshipment. Be sure to use the original packing materials when moving the projector. Use special caution for the lens.
Part names

Projector

(1) Speaker (24, 64)
(2) Filter cover (93)

   The air filter and intake vent are inside.
(3) Elevator feet (x3) (27)
(4) Remote sensor (21)
(5) Lens (96)
(6) Lens cover
(7) Intake vents
(8) Control panel (5)
(9) FOCUS ring (28)
(10) ZOOM ring (28)
(11) AC (AC inlet) (17)
(12) Exhaust vent
(13) Ports (5)
(14) Security bar (18)
(15) Security slot (18)
(16) Spacer (x 2) (27)
(17) Battery cover (95)

⚠️ WARNING ⚠️ Do not open or remove any portion of the product, unless the manuals direct it.

► Do not subject the projector to unstable conditions.
► Do not apply a shock or pressure to this product.
► Do not look into the lens and the openings on the projector while the light source is on, since the projection ray may cause a trouble on your eyes.
► Keep any object away from concentrated projection light beam. Blocking the beam by something causes high temperature and could result in fire or smoke.

⚠️ CAUTION ⚠️ Do not touch around the exhaust vents during use or just after use, since it is too hot.
► Do not attach anything onto the lens except the lens cover of this projector because it could damage the lens, such as melting the lens.

(30) ▲/▼/◄/► cursor buttons (40)  
(31) Battery cover (20)

NOTE • Any button marked with “*” is not supported on this projector (99).
**Setting up**

Install the projector according to the environment and manner the projector will be used in.

This projector will perform in a free tilt angle, as shown in the figures below.

For the case of installation in a special state such as ceiling mount, the specified mounting accessories and service may be required. Before installing the projector, consult your dealer about your installation.

**Arrangement**

Refer to table T-1 in the end of Setup Guide to determine the screen size and projection distance.

The values shown in the table are calculated for a full size screen.

- **Screen size** (diagonal)
- **Projection distance** (±10%, from the projector’s end)
- **Screen height** (±10%)

**NOTE** • The screen position may shift after installation if the projector is suspended from the ceiling or other location due to the flexibility of the plastic projector body. If readjustment is necessary, consult with your dealer or service personnel.

(continued on next page)
Arrangement (continued)

⚠️ **WARNING** ▶ Install the projector where you can access the power outlet easily. If an abnormality should occur, unplug the projector urgently. Otherwise it could cause a fire or electric shock.
▶ **Do not subject the projector to unstable conditions.** If the projector falls or topples over, it could result in injury or damage to the projector and the surrounding things. Using a damaged projector could result in a fire and an electric shock.
   • Do not place the projector in unstable places, such as an inclined surface, places subject to vibration, on top of a wobbly table or cart, or a surface that is smaller than the projector.
   • Do not put the projector on its side, front or rear position.
   • Do not attach nor place anything on the projector unless otherwise specified in the manual.
   • Do not use any mounting accessories except the accessories specified by the manufacturer. Read and keep the manuals of the accessories used.
   • For special installation such as ceiling mounting, be sure to consult your dealer beforehand.
▶ **Do not install the projector near thermally conductive or flammable things.** Such things when heated by the projector could result in a fire and burns.
   • Do not place the projector on a metal stand.
▶ **Do not place the projector where any oils, such as cooking or machine oil, are used.** Oil may harm the product, resulting in malfunction, or falling from the mounted position. Do not use adhesive such as threadlocker, lubricant and so on.
▶ **Do not place the projector in a place where it may get wet.** Getting the projector wet or inserting liquid into the projector could cause a fire and an electric shock, and damage the projector.
   • Do not place the projector near water, such as in a bathroom, kitchen, or poolside.
   • Do not place the projector outdoors or by the window.
   • Do not place anything containing liquid near the projector.

(continued on next page)
Setting up

Arrangement (continued)

⚠️ **CAUTION** ►Place the projector in a cool place with sufficient ventilation. The projector may shutdown automatically or may malfunction if its internal temperature is too high. Using a damaged projector could result in a fire and an electric shock.

- Do not place the projector in direct sunlight or near hot objects such as heaters.
- Do not place the projector where the air from an air conditioner or similar unit will blow on it directly.
- Keep a space of 50 cm or more between a side of the projector and other objects such as walls.
- Do not place the projector on carpet, cushions or bedding.
- Do not stop up, block nor cover the projector’s vent holes. Do not place anything around the projector that could be sucked in or stuck to the projector’s intake vents.
- Do not place the projector at places that are exposed to magnetic fields, doing so can cause the cooling fans inside the projector to malfunction.
- When you use the projector with the air filter facing towards the ceiling, it is clogged more frequently. Clean the air filter periodically.

► **Avoid placing the projector in smoky, humid or dusty place.** Placing the projector in such places could cause a fire, an electric shock and malfunction of the projector.

- Do not place the projector near humidifiers. Especially for an ultrasonic humidifier, chlorine and minerals contained in tap water are atomized and could be deposited in the projector causing image degradation or other problems.

**NOTICE** • Do not place the projector in a smoking area, kitchen, passageway or by the window.

- Position the projector to prevent light from directly hitting the projector’s remote sensor.
- Positional deviation or distortion of a projected image, or shift of the focus may occur due to ambient conditions, and so on. They tend to occur until the operation becomes stable, especially within about 30 minutes after the light source is turned on. Check and readjust them as necessary.
- Do not place the product in a place where radio interference may be caused.
- Keep heat-sensitive things away from the projector. Otherwise, they may be damaged by the heat from the projector.

**NOTE** • When the ambient temperature is around 35 to 40°C, the brightness of light source is reduced automatically.
Setting up

Connecting with your devices

Before connecting the projector to a device, consult the manual of the device to confirm that the device is suitable for connecting with this projector and prepare the required accessories, such as a cable in accord with the signal of the device. Consult your dealer when the required accessory did not come with the product or the accessory is damaged.

After making sure that the projector and the devices are turned off, perform the connection, according to the following instructions. Refer to the figures in subsequent pages.

Before connecting the projector to a network system, be sure to read Network Guide too.

⚠️ **WARNING**  ► Use only the appropriate accessories. Otherwise it could cause a fire or damage the projector and devices.
- Use only the accessories specified or recommended by the projector’s manufacturer. It may be regulated under some standard.
- Neither disassemble nor modify the projector and the accessories.
- Do not use the damaged accessory. Be careful not to damage the accessories.

Route a cable so that it is neither stepped on nor pinched out.

⚠️ **CAUTION**  ► For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.

**NOTE**

- Do not turn on or off the projector while connected to a device in operation, unless that is directed in the manual of the device. Otherwise it may cause malfunction in the device or projector.
- The function of some input ports can be selected according to your usage requirements. Check the reference page indicated beside each port in the following illustration. (11 ~ 15)
- Be careful not to mistakenly connect a connector to a wrong port. Otherwise it may cause malfunction in the device or projector.
  - When connecting a connector to a port, make sure that the shape of the connector fits the port.
  - Tighten the screws to connect a connector equipped with screws to a port.
  - Use the cables with straight plugs, not L-shaped ones, as the input ports of the projector are recessed.

About Plug-and-Play capability

- Plug-and-Play is a system composed of a computer, its operating system and peripheral equipment (i.e. display devices). This projector is VESA DDC 2B compatible. Plug-and-Play can be used by connecting this projector to a computer that is VESA DDC (display data channel) compatible.
  - Take advantage of this feature by connecting a computer cable to the COMPUTER IN 1 port (DDC 2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
  - Please use the standard drivers in your computer as this projector is a Plug-and-Play monitor.

(continued on next page)
Connecting with your devices (continued)

• Before connecting the projector to a computer, consult the computer’s manual and check the compatibility of the signal level, the synchronization methods and the display resolution output to the projector.
  - Some signal may need an adapter to input this projector.
  - Some computers have multiple screen display modes that may include some signals which are not supported by this projector.
  - Although the projector can display signals with a resolution up to 4K(4096x2160), the signal will be converted to the projector’s panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and the projector panel are identical.
• If you connect this projector and a notebook computer, you need output the display to an external monitor, or output simultaneously to the internal display and an external monitor. Consult the computer’s manual for the setting.
• Depending on the input signal, the automatic adjustment function of this projector may take some time and not function correctly.
  - Note that a composite sync signal or sync-on-green signal may confuse the automatic adjustment function of this projector (30).
  - If the automatic adjustment function does not work correctly, you may not see the dialog to set the display resolution. In such a case, use an external display device. You may be able to see the dialog and set an appropriate display resolution.

(continued on next page)
CAUTION ▶ Before connecting the projector to a network system, be sure to obtain the consent of the administrator of the network.
▶ Do not connect the LAN port to any network that might have the excessive voltage.
▶ The designated USB wireless adapter that is sold as an option is required to use the wireless network function of this projector.
▶ Do not use any extension cable or device when connecting the adapter to the projector. Before you insert or pull out the USB wireless adapter from the projector, turn off the power of the projector and pull out the power cord’s plug from the outlet. Do not touch the USB wireless adapter while the projector is receiving AC power.
▶ To connect both the LAN cable and USB device to the projector, use a LAN cable that is flat on the side where the plug’s wire is visible. Otherwise, both of them cannot be connected correctly, or the wire may break (malfunction).

(continued on next page)
Connecting with your devices (continued)

VCR/DVD/Blu-ray Disc™ player

About HDBaseT™ connection

- HDBaseT™ is a technology to transmit image, sound, ethernet or serial control signal via LAN cable.
- Go to the following URL regarding the device of other company that supports HDBaseT™ and has been confirmed compatible with this projector.
  [http://www.christiedigital.com](http://www.christiedigital.com)
- LAN or HDBaseT™ input port can be selected as ethernet signal input by switching in the menu.
- Use LAN cables of up to 100m long. (Up to 70m long for 4K signal.)
  Exceeding this length, the image and sounds will be deteriorated, and even experience malfunction on LAN transmission.
- Qualified cable is required for HDBaseT™ connection.

(continued on next page)
Connecting with your devices (continued)

**NOTE** • The HDMI™ port of this model is compatible with HDCP (High-bandwidth Digital Content Protection) and therefore capable of displaying a video signal from HDCP compatible DVD players or the like.
- The HDMI™ port supports the following signals.
  Video signal : 480i@60, 480p@60, 576i@50, 576p@50, 720p@50/60, 1080i@50/60, 1080p@50/60, 4k@24/25/30
  Audio signal : Format Linear PCM
    Sampling frequency 48kHz / 44.1kHz / 32kHz
- This projector can be connected with another equipment that has HDMI™ connector, but with some equipment the projector may not work properly, something like no video.
- Be sure to use an HDMI™ cable that has the HDMI™ logo.
- Use a Category 2-certified HDMI™ cable to input 1080p@50/60, 4k@24/25/30 signal to the projector.
- When the projector is connected with a device having DVI connector, use a DVI to HDMI™ cable to connect with the HDMI™ input.

Connecting with your devices (continued)
Setting up

Connecting with your devices (continued)

Fastening the cable

Use the supplied cable tie to fasten the cables.

Remove the screw located on the lower side of HDMI connector and use it to attach the HDMI cable holder.

It is recommended to fasten the HDMI cables by using the HDMI cable holder and the Cable tie to prevent them from coming off. Use a Cable tie with the size of 2.0 x 4.0mm or smaller.

► Do not fasten the cables other than HDMI.
► To fasten the cable, use a supplied Cable tie or plastic tie with the size of 2.0 x 4.0mm or smaller. A metallic tie may cause damage to the cables and tie holder.
► Do not bind the cables too tightly. The cables or the hole might be damaged.

⚠️ WARNING

⚠️ CAUTION
Connecting to a power supply

1. Put the connector of the power cord into the AC (AC inlet) of the projector.

2. Firmly plug the power cord’s plug into the outlet. In a couple of seconds after the power supply connection, the POWER/STATUS indicator will light up in steady orange.

Please remember that when the DIRECT POWER ON function is activated (71), the connection of the power supply makes the projector turn on.

When the AUTO POWER ON function is activated and the projector is receiving an input signal, it is turned on by connecting to the power supply (71).

⚠️ WARNING ⚠️ Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.

- Do not touch the power cord with a wet hand.
- Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one. Never modify the power cord.
- Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible. Unplug the power cord for complete disconnection.
- Do not distribute the power supply to multiple devices. Doing so may overload the outlet and connectors, loosen the connection, or result in fire, electric shock or other accidents.
- Connect the ground terminal for the AC inlet of this unit to the ground terminal of the building using an appropriate power cord (bundled).

⚠️ NOTICE ⚠️ This product is also designed for IT power systems with a phase-to-phase voltage of 220 to 240 V.

Fastening the cable

Use the supplied cable tie to fasten the cable.
Using the security bar and slot

A commercially available anti-theft chain or wire can be attached to the security bar on the projector. Refer to the figure to choose an anti-theft chain or wire. Also, this product has the security slot for the Kensington lock. For details, see the manual of the security tool.

⚠️ WARNING
- Do not use the security bar and slot to prevent the projector from falling down, since it is not designed for it.

⚠️ CAUTION
- Do not place anti-theft chain or wire near the exhaust vents. It may become too hot.

**NOTE** • The security bar and slot is not comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.
Setting up

When using the optional suspension bracket, fix the bundled hook metal and screws securely, and attach the drop-prevention chain.

- Pass the drop-prevention chain through the hole of the optional suspension bracket and hook metal, and fix it securely with a quick link.

- Fix the drop-prevention chain with a quick link so that it cannot have any slack as shown in the drawing.
**Remote control**

**Installing the batteries**

Please insert the batteries into the remote control before using it. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for long period, remove the batteries from the remote control and store them in a safe place.

1. Remove the battery cover.

2. Align and insert the two AA batteries according to their plus and minus terminals as indicated in the remote control. (Use the appropriate AA carbon-zinc or alkaline batteries (non-rechargeable) in accordance with laws and regulations.)

3. Put the battery cover back to the former state.

**WARNING**

Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.

- Be sure to use only the specified batteries. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets.
- Do not recharge, short circuit, solder or disassemble a battery.
- Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery.
- If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing the battery.
About the remote control signal

The remote control works with the projector’s remote sensor. This projector has a remote sensor on the front. The sensor senses the signal within the following range when the sensor is active:

- 60 degrees (30 degrees to the left and right of the sensor) within about 3 meters.

**NOTE**
- The remote control signal reflected in the screen or the like may be available. If it is difficult to send the signal to the sensor directly, attempt to make the signal reflect.
- The remote control uses infrared light to send signals to the projector (Class 1 LED), so be sure to use the remote control in an area free from obstacles that could block the remote control’s signal to the projector.
- The remote control may not work correctly if strong light (such as direct sunlight) or light from an extremely close range (such as from an inverter fluorescent lamp) shines on the remote sensor of the projector. Adjust the position of projector avoiding those lights.

Changing the frequency of remote control signal

The accessory remote control has the two choices on signal frequency Mode 1:NORMAL and Mode 2:HIGH. If the remote control does not function properly, attempt to change the signal frequency.

In order to set the Mode, please keep pressing the combination of two buttons listed below simultaneously for about 3 seconds.

1. Set to Mode 1:NORMAL
   - **VOLUME -** and **RESET** buttons

2. Set to Mode 2:HIGH
   - **MAGNIFY OFF** and **ESC** buttons

Please remember that the REMOTE FREQ. in the SERVICE item of the OPTION menu (81) of the projector to be controlled should be set to the same mode as the remote control.
Turning on the power

1. Make sure that the power cord is firmly and correctly connected to the projector and the outlet.

2. Make sure that the POWER/STATUS indicator is lighted in steady orange (100). Then remove the lens cover.

3. Press the STANDBY/ON button on the projector or the remote control. The projection light source will light up, and the POWER/STATUS indicator will begin blinking green. When the power is completely on, the indicator will stop blinking and light in steady green (100).

To display the picture, select an input signal according to the section Selecting an input signal (25).
1. Press the STANDBY/ON button on the projector or the remote control. The message “Power off?” will appear on the screen for about 5 seconds.

2. Press the STANDBY/ON button again while the message appears. The light source will go off, and the POWER/STATUS indicator will begin blinking in orange. Then the POWER/STATUS indicator will stop blinking and light in steady orange when the light source cooling is complete (100).

3. Attach the lens cover, after the POWER/STATUS indicator turns to steady orange.

**WARNING** ► A strong light is emitted when the projector’s power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector’s openings since the projection ray may cause a trouble on your eyes.
► Keep any object away from concentrated projection light beam. Blocking the beam by something causes high temperature and could result in fire or smoke.
► Do not touch around the exhaust vents during use or just after use, since it is too hot.

**NOTE** • Turn the power on/off in right order. Please power on the projector prior to the connected devices.
• This projector has the function that can make the projector automatically turn on/off. Please refer to the DIRECT POWER ON (71), AUTO POWER ON (71) and AUTO POWER OFF (72) items of the OPTION menu.
Operating

Adjusting the volume

Use the VOLUME + / - buttons to adjust the volume. A dialog will appear on the screen to aid you in adjusting the volume. If you do not do anything, the dialog will automatically disappear after a few seconds.

NOTE • When ♃ is selected for current picture input port, the volume adjustment is disabled. Please see AUDIO SOURCE item of AUDIO menu (64).
• Even if the projector is in the standby mode, the volume is adjustable when both of the following conditions are true:
  - An option other than ♃ is selected for AUDIO OUT in the STANDBY OUTPUT item of the SETUP menu (63).
  - NORMAL or QUICK START is selected in the STANDBY MODE item of the SETUP menu (61).

Temporarily muting the sound

Press MUTE button on the remote control. A dialog will appear on the screen indicating that you have muted the sound. To restore the sound, press the MUTE, VOLUME + or VOLUME - button. Even if you do not do anything, the dialog will automatically disappear after a few seconds.

NOTE • When ♃ is selected for current picture input port, the sound is always muted. Please see AUDIO SOURCE item of AUDIO menu (64).
• Closed Caption C.C. is automatically activated when sound is muted and an input signal containing Closed Caption C.C. is received. This function is available only when the signal is NTSC for VIDEO or 480i@60 for COMPUTER IN1 or COMPUTER IN2, and when AUTO is selected for DISPLAY in the Closed Caption C.C. menu under the MENU PREFERENCES menu (69).
Selecting an input signal

Press the **INPUT** button on the projector or the remote control. Select a desirable input referring to the displayed input list.

- While ON is selected for AUTO SEARCH item in OPTION menu (70), the projector will keep checking the ports repeatedly till an input signal is detected. The ports can be set to be ignored in searching by the AUTO SEARCH function.

Selecting an aspect ratio

Press **ASPECT** button on the remote control. Each time you press the button, the projector switches the mode for aspect ratio in turn.

- For a computer signal, HDMI™ and HDBaseT™ signals, a video signal or component video signal
  
  NORMAL \(\rightarrow\) 4:3 \(\rightarrow\) 16:9 \(\rightarrow\) 16:10 \(\rightarrow\) 14:9 \(\rightarrow\) ZOOM \(\rightarrow\) NATIVE

- For an input signal from the LAN port, or if there is no signal
  
  16:10 (fixed)

- **ASPECT** button does not work when no proper signal is input.
- NORMAL mode keeps the original aspect ratio setting.
- The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, KEystone, KEYSTONE and 3D KEYSTONE. Changing the values of ASPECT, KEYSTONE, KEYSTONE and 3D KEYSTONE may fix the symptom.
Limiting OSD display

To change this function, follow the steps below.
1. Press the **OSD MSG** button on the remote control for 3 seconds.
2. The INHIBIT OSD will be displayed.
   While this OSD is displayed, press the **OSD MSG** button again on the remote control.
3. Toggle and change the function.
   
   ON ⇔ OFF ⇔ HIDE

---

**OSD MSG** button
Adjusting the projector’s elevator

Lengthening or shortening each elevator foot shifts the projection position and the projection angle.

Turn the elevator foot to adjust its length.

When the place to put the projector is slightly uneven to the left or right, use the rear elevator feet to place the projector horizontally.

Spacers are installed on each rear elevator feet at the time of shipment, and the projector is ready for use as it is.

If necessary, detach the spacer, and the elevator foot can be manually twisted to make more precise adjustments.

⚠️ WARNING ❯ Do not lengthen the elevator foot exceeding 25 mm. The foot lengthened exceeding the limit may come off and drop the projector down, and result in an injury or damaging the projector.

► Keep the spacer away from children and pets. Be careful not to let them swallow the spacer. If swallowed consult a physician immediately for emergency treatment.

NOTE • You can attach the spacers to set the projector back to the factory default after adjusting the foot. If you install the projector in a different place in the future, it is recommended to keep the spacers and reuse them.
Adjusting the zoom and focus

1. Use the ZOOM ring to adjust the screen size.

2. Use the FOCUS ring to focus the picture.

3. Fasten the ZOOM ring by STOPPER so that it cannot loosen.

⚠️ **CAUTION** ► Tighten the STOPPER of the ZOOM ring if you install the projector when the lens faces upward (+30°~ +150°) or downward (-30°~ -150°). Be careful not to tighten the STOPPER too tightly. Otherwise it would cause malfunction in the projector. When you tighten the STOPPER, the projected screen may move slightly.
Adjusting the lens shift

1. Turn the VERTICAL adjuster fully counter clockwise. Then turn it clockwise and adjust the vertical lens position upward.

2. Turn the HORIZONTAL adjuster clockwise or counter clockwise to adjust the horizontal lens position.

⚠️ CAUTION ⚠️ Operate the lens adjusters gently as the lens may malfunction when subjected to shocks. It may need more strength to turn the adjusters near the adjustment limits. Be careful not to apply too much strength. If the lens adjuster is turned excessively, it runs idle by a clutch mechanism inside the adjuster. Although it makes a clicking sound, it is not a malfunction. When the lens adjuster runs idle, the lens shift cannot be performed further. Turn the lens adjuster to the opposite direction to adjust the lens shift. When the lens adjuster is turned too quickly, it may make a clicking sound by a clutch mechanism. In that case, turn it slowly to adjust the lens shift.

- When adjusting the lens shift to the maximal oblique direction, the periphery of the projected screen may be dark or a shadow may be cast.
- When adjusting the lens shift vertically, perform it by moving the projected screen upward. If adjusting the lens shift by moving the projected screen downward, the projected screen may be adjusted slightly low.

NOTE • When the lens adjuster runs idle with a clicking sound and it still makes a sound by a clutch mechanism even if it is turned to the opposite direction, turn the lens adjuster while pressing it downward to perform the lens shift.
Using the automatic adjustment feature

Press AUTO button on the remote control.
Pressing this button performs the following.

- **For a computer signal**
  The vertical position, the horizontal position and the horizontal phase will be automatically adjusted.
  Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.

- **For a video signal**
  The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (53). The vertical position and horizontal position will be automatically set to the default.

- **For a component video signal**
  The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.

**NOTE**
- The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.
- When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.
- When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the computer model.
- The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO IMAGE ADJUST item of the SERVICE item in the OPTION menu (78).
Correcting the distortion

To correct the distortion of projected screen, you can select either KEYSTONE or 3D KEYSTONE. First press the GEOMETRY button to display the GEOMETRY CORRECTION menu, and point at one of the items with the ▲/▼ buttons.

**KEYSTONE**: allows you to adjust the vertical and horizontal keystone.

**3D KEYSTONE**: allows you to adjust each of the screen corners and sides to correct the distortion.

Use KEYSTONE / 3D KEYSTONE for adjustment. When one of them is selected, the other item is not available.

Then follow the procedure shown below for the item you selected.

---

**NOTE** • The menu or dialog will automatically disappear after several seconds of inactivity. Press the GEOMETRY button again, or point the cursor at EXIT in the dialog and press the ► or ENTER button to end the operation and close the menu or dialog.

---

**KEYSTONE:**

When KEYSTONE is pointed at, pressing the ► or ENTER button displays the KEYSTONE dialog.

1. Select the vertical or horizontal keystone (▲ / ▼) with the ▲/▼ buttons.

2. Use the ◄/► buttons to adjust the keystone distortion.

---

**NOTE** • When the zoom adjustment is set to the TELE (telephoto focus), this function may be excessive. This function should be used when the zoom adjustment is set to the full WIDE (wide-angle focus).

• When the horizontal lens shift is not set to the center, this function may not work correctly.

• Point at RETURN in the dialog with the ▲/▼ buttons and press ◄ or ENTER button to return to the GEOMETRY CORRECTION menu.

(continued on next page)
Correcting the distortion (continued)

**NOTE** • The adjustable range of this function will vary among inputs. For some input, this function may not work well.
• When the projector is inclined to near ±30 degree or over, this function may not work well.
• The display will be dark for a split second while switching the KEYSTONE, but this is not a malfunction.

3D KEYSTONE:
When 3D KEYSTONE is pointed at, pressing the ► or ENTER button displays the 3D KEYSTONE dialog.
This projector is equipped with a test pattern for 3D KEYSTONE. Select TEST PATTERNS with the ▲/▼ buttons, then press the ◄/► buttons to select pattern.

(continued on next page)
**Correcting the distortion (continued)**

1. Select SETUP with the ▲/▼ buttons and press the ► or ENTER button.

2. Select one of the corners or sides to be adjusted with the ▲/▼/◄/► buttons and press the ENTER or □ button.

3. Adjust the selected part as below.
   - For adjusting a corner, use the ▲/▼/◄/► buttons to adjust the position of the corner.
   - For adjusting the upper or lower side, use the ▲/▼ buttons to adjust the distortion of the side.
   - For adjusting the left or right side, use the ◄/► buttons to adjust the distortion of the side.
   - To adjust another corner or side, press the ENTER or □ button and follow the procedure from step 2.

4. This projector is equipped with a memory feature for 3D KEYSTONE adjustment. Up to 3 sets of adjustments can be stored.
   - **SAVE:**
     To store the current 3D KEYSTONE adjustment, select one of the "SAVE" options numbered 1 to 3 (number of the memory) with the ▲/▼ buttons and press the ►, ENTER or □ button.
     The current data being stored are lost by saving new data.
   - **LOAD:**
     To recall stored adjustments, select one of the "LOAD" options numbered 1 to 3 (number of the memory) with the ▲/▼ buttons and press the ►, ENTER or □ button.
     The current adjusted condition is lost by loading data. If you want to keep the current adjustment, save it before performing a LOAD function.

**NOTE**
- The LOAD functions whose linked memories have no data are skipped.
- There may be some noise and the screen may flicker for a moment when loading data. This is not malfunction.
Using the magnify feature

1. Press the MAGNIFY ON button on the remote control. The picture will be magnified, and the MAGNIFY dialog will appear on the screen. When the MAGNIFY ON button is pressed for the first time after the projector is turned on, the picture will be zoomed by 1.5 times. On the dialog, triangle marks to show each direction will be displayed.

2. The display magnification of the projector switches in order with every press of the MAGNIFY ON button.

   1.5 times → 2 times → 3 times → 4 times → 1 time

   ![Magnify ON/OFF button]

3. While the triangles are displayed on the dialog, use the ▲/▼/◄/► cursor buttons to shift the magnifying area.

4. Press the MAGNIFY OFF button on the remote control to exit magnification.

   ● The MAGNIFY dialog will automatically disappear in several seconds with no operation. The dialog will appear again if the MAGNIFY ON button is pressed when the dialog has automatically disappeared.
   ● The magnification is automatically disabled when the displaying signal or its display condition is changed.
   ● While the magnification is active, the keystone distortion condition may vary. It will be restored when the magnification is disabled.
   ● Some horizontal stripes might be visible on the image while magnification is active.
   ● This function is not available in the following cases:
     - A sync signal in the range which is not supported is input.
     - There is no input signal.
Temporarily freezing the screen

Press the FREEZE button on the remote control. The “FREEZE” indication will appear on the screen (however, the indication will not appear when OFF is selected for the OSD MESSAGE item in the SETUP (63)), and the projector will go into the FREEZE mode, which the picture is frozen. To exit the FREEZE mode and restore the screen to normal, press the FREEZE button again.

NOTE • The projector automatically exits from the FREEZE mode when some control buttons are pressed.
• If the projector continues projecting a still image for a long time, the LCD panel might possibly be burned in. Do not leave the projector in the FREEZE mode for too long.
• Images might appear degraded when this function is operated, but it is not a malfunction.

Temporarily blanking the screen

Press BLANK button on the remote control. The BLANK screen will be displayed instead of the screen of input signal. Please refer to BLANK item in MENU PREFERENCES (65). To exit from the BLANK screen and return to the input signal screen, press BLANK button again.

• The projector automatically exits from the BLANK mode when some control buttons are pressed.

⚠️ CAUTION ⚠️ If you wish to have a blank screen while the light source is lit, use the BLANK function above. Taking any other action may cause the damage on the projector.

NOTE • The sound is not muted even if the BLANK screen is displayed. If necessary, adjust the volume or mute the sound in advance.
Operating

PbyP (Picture by Picture) / PIP (Picture in Picture)

The PbyP / PIP is a function for displaying two different picture signals on a screen that is separated into main and sub areas for each signal.

Press the PbyP button on the remote control. This activates the PbyP mode. Then, press the PbyP button again. The projector goes into PIP mode. The screen displayed before the PbyP button was pressed will be displayed as the main area. Most of operations are effective for the main area only. Only outputs the audio input signal paired with the picture input signal for the main area. To quit the PIP mode, press the PbyP button again.

NOTE • If the LAN port is selected when the PbyP button is pressed, input from other port is displayed on the main area.
• When in the PbyP / PIP mode, use the MENU button on the remote control or ▲/▼ buttons on the control panel to display the OSD menu.
• There are certain functions that cannot be used when in the PbyP / PIP mode.
• A message will be displayed when buttons that cannot be used are pressed (🛠️99). However, note that there are certain unusable buttons for which messages are not displayed.
• The functions on the OSD menu that cannot be used are displayed in gray and cannot be selected.
• When in the PbyP / PIP mode, image quality may deteriorate.

(continued on next page)
**PbyP (Picture by Picture) / PIP (Picture in Picture) (continued)**

- **Setting information**
  The setting information will be appeared for several seconds when the PbyP / PIP function is started. Displays the input information for each area. A frame around the main area and an audio mark indicating the audio output will also be displayed. The information can be redisplayed with the ◄/► buttons after it has been erased.

  ![Setting information diagram](image)

- **Changing the main area**
  The position of the main area can be toggled with the ◄/► buttons when the setting information is displayed on the screen. The frame and the audio mark will move together with it.

  ![Changing the main area diagram](image)

(continued on next page)
Press any button to select an input port on the remote control or press the **INPUT** button on the control panel. A dialog box to select the input signal for the main area will be displayed. Choose a signal using the ▲/▼ buttons. To change the signal in the sub area, switch temporarily across to the main area with the ◄/► buttons.

Displaying the same signal on the both areas is not allowed. Refer to the table for details on available input signal combinations. Any combinations marked with "X" cannot be selected.

PbyP (Picture by Picture) / PIP (Picture in Picture) (continued)

- **PbyP /PIP SWAP function**
  Press the MY BUTTON assigned the PbyP / PIP SWAP (73). The position of the both area is exchanged without any setting change.

- **Changing the size of main area in PbyP mode**
  Using ▲/▼ buttons on the remote control changes the size of main area in PbyP mode.

- **Changing the position of sub area in PIP mode**
  2. Using ▲/▼ buttons on the remote control changes the position of sub area in PIP mode.
Using the menu function

This projector has the following menus: IMAGE SETTINGS, SIZE AND POSITION, INPUT, SETUP, AUDIO, MENU PREFERENCES, OPTION, NETWORK, SECURITY and EASY MENU. EASY MENU consists of functions often used, and the other menus are classified into each purpose and brought together as the ADVANCED MENU. Each of these menus is operated using the same methods. While the projector is displaying any menu, the MENU button on the projector works as the cursor buttons. The basic operations of these menus are as follows.

1. To start the MENU, press the MENU button. The MENU you last used (EASY or ADVANCED) will appear. EASY MENU has priority to appear just after powered on.

2. In the EASY MENU
   (1) Use the ▲/▼ cursor buttons to select an item to operate. If you want to change it to the ADVANCED MENU, select the ADVANCED MENU.
   (2) Use the ◄/► cursor buttons to operate the item.

In the ADVANCED MENU
   (1) Use the ▲/▼ cursor buttons to select a menu. If you want to change it to the EASY MENU, select the EASY MENU. The items in the menu appear on the right side.
   (2) Press the ► cursor button or ENTER button to move the cursor to the right side. Then use the ▲/▼ cursor buttons to select an item to operate and press the ► cursor button or ENTER button to progress. The operation menu or dialog of the selected item will appear.
   (3) Use the buttons as instructed in the OSD to operate the item.

(continued on next page)
Using the menu function (continued)

3. To close the MENU, press the MENU button again or select EXIT and press the ◄ cursor button or ENTER button. Even if you do not do anything, the dialog will automatically disappear after about 30 seconds.

**NOTE**
- Some functions cannot be performed when a certain input port is selected, or when a certain input signal is displayed.
- When you want to reset the operation, press RESET button on the remote control during the operation. Note that some items (ex. LANGUAGE, VOLUME) cannot be reset.
- In the ADVANCED MENU, when you want to return to the previous display, press the ◄ cursor button or ESC button on the remote control.

Indication in OSD (On Screen Display)

The meanings of the general words on the OSD are as follows.

<table>
<thead>
<tr>
<th>Indication</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>EXIT</td>
<td>Selecting this word finishes the OSD menu. It is the same as pressing the MENU button.</td>
</tr>
<tr>
<td>RETURN</td>
<td>Selecting this word returns the menu to the previous menu.</td>
</tr>
<tr>
<td>CANCEL or NO</td>
<td>Selecting this word cancels the operation in the present menu and returns to the previous menu.</td>
</tr>
<tr>
<td>OK or YES</td>
<td>Selecting this word executes the prepared function or shifts the menu to the next menu.</td>
</tr>
</tbody>
</table>

<td>Pressing the ► button displays the dialog for correcting the keystone distortion (31).</td>
</tr>
<tr>
<td>3D KEYSTONE</td>
<td>Pressing the ► button displays the dialog for adjusting the shape of the projected image in each of the corners and sides. See the 3D KEYSTONE item in SETUP menu (58).</td>
</tr>
</tbody>
</table>
| PICTURE MODE  | Using the ◄/► buttons switches the picture mode. The picture modes are combinations of GAMMA and COLOR TEMP settings. Choose a suitable mode according to the projected source.  
  • Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.  
  • DICOM SIM. is the projector's DICOM® ("Digital Imaging and Communication in Medicine") simulation mode. This mode simulates the DICOM standard, which is a standard applicable to digital communications in medicine, and can be useful for displaying medical images, such as X-rays photos. This projector is not a medical device and is not compliant to the DICOM standard, and neither the projector nor the DICOM SIM. mode should be used for medical diagnosis. |

| **V POSITION** | Using the ◄/► buttons adjusts the vertical position.  
   Down ⇔ Up  
   • Over-adjusting the vertical position may cause noise to appear on the screen. If this occurs, please reset the vertical position to the default setting. Pressing the **RESET** button when the V POSITION is selected will reset the V POSITION to the default setting.  
   • When this function is performed on a video signal, the range of this adjustment depends on OVER SCAN (49) setting. It is not possible to adjust when OVER SCAN is set to 10.  
   • This function is unavailable for a signal from the **LAN, HDMI 1, HDMI 2 or HDBaseT** port. |
| **H POSITION** | Using the ◄/► buttons adjusts the horizontal position.  
   Right ⇔ Left  
   • Over-adjusting the horizontal position may cause noise to appear on the screen. If this occurs, please reset the horizontal position to the default setting. Pressing the **RESET** button when the H POSITION is selected will reset the H POSITION to the default setting.  
   • When this function is performed on a video signal, the range of this adjustment depends on OVER SCAN (49) setting. It is not possible to adjust when OVER SCAN is set to 10.  
   • This function is unavailable for a signal from the **LAN, HDMI 1, HDMI 2 or HDBaseT** port. |
| **H PHASE** | Using the ◄/► buttons adjusts the horizontal phase to eliminate flicker.  
   Right ⇔ Left  
   • This item can be selected only for a computer signal or a component video signal. This function is unavailable for a signal from the **LAN, HDMI 1, HDMI 2 or HDBaseT** port. |

### SIZE AND POSITION menu

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| **H SIZE** | Using the ◄/► buttons adjusts the horizontal size.  
  - Small ↔ Large  
  - This item can be selected only for a computer signal. This function is unavailable for a signal from the LAN, HDMI 1, HDMI 2 or HDBaseT port.  
  - When this adjustment is excessive, the picture may not be displayed correctly. In such a case, please reset the adjustment by pressing the **RESET** button on the remote control during this operation.  
  - Images might appear degraded when this function is operated, but it is not a malfunction.                                                                                                                                                                                                                   |
| **AUTO IMAGE** | Selecting this item performs the automatic adjustment feature.  
  **For a computer signal**  
  The vertical position, the horizontal position and the horizontal phase will be automatically adjusted.  
  Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.  
  **For a video signal**  
  The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (53). The vertical position and horizontal position will be automatically set to the default.  
  **For a component video signal**  
  The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.  
  - The automatic adjustment operation requires approx. 10 seconds. Also, please note that it may not function correctly with some input.  
  - When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.  
  - When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the PC model.  
  - The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO IMAGE ADJUST item of the SERVICE item in the OPTION menu (78).                                                                 |
From the INPUT menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item. Then perform it according to the following table.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| **PROGRESSIVE** | Using the ▲/▼ buttons switches the progress mode.  
TV ⇔ FILM ⇔ OFF  
• This function works only for a video signal, component video signal (of 480i@60 or 576i@50 or 1080i@50/60) and an HDMI™ signal (of 480i@60 or 576i@50 or 1080i@50/60).  
• When TV or FILM is selected, the screen image will be sharp. FILM adapts to the 2-3 Pull-Down conversion system. But these may cause a certain defect (for example, jagged line) of the picture for a quick moving object. In such a case, please select OFF, even if the screen image may lose sharpness. |
| **VIDEO NR**   | Using the ▲/▼ buttons switches the noise reduction mode.  
HIGH ⇔ MID ⇔ LOW  
• This function works only for a video signal, component video signal (of 480i@60 or 576i@50 or 1080i@50/60) and an HDMI™ signal (of 480i@60 or 576i@50 or 1080i@50/60). |
| **COLOR SPACE** | Using the ▲/▼ buttons switches the mode for color space.  
AUTO ⇔ RGB ⇔ SMPTE240 ⇔ REC709 ⇔ REC601  
• This item can be selected only for a computer signal, component video signal(except for signals from the LAN port) or an HDMI™ signal.  
• The AUTO mode automatically selects the optimum mode.  
• The AUTO operation may not work well at some signals. In such a case, it might be good to select a suitable mode except AUTO. |

<th>Description</th>
</tr>
</thead>
</table>
| **LIGHT OUTPUT**      | Using the ▲/▼ buttons switches the LIGHT OUTPUT.  
  NORMAL ⇔ LIGHT 75% ⇔ LIGHT 50% ⇔ QUIET MODE  
  • When the ambient temperature is around 35 to 40°C, the brightness of light source is reduced automatically.  
  • When NORMAL is selected, you can change the brightness.  
  • LIGHT 75% and LIGHT 50% are specialized modes for long life of the light source. They restrict the brightness of a light source and perform appropriate cooling for the long life of a light source.  
  • QUIET MODE is a specialized mode for low noise. It restricts the brightness of a light source.  
  • When the vertical frequency of the input signal is 50Hz, the brightness of light source may be reduced automatically to reduce flicker, in case of the FLICKER REDUCTION is ON (78). If you do not want to reduce the brightness, set FLICKER REDUCTION to OFF (78).  
  • The brightness of the light source may be reduced depending on the direction of the projection. |
| **LIGHT SOURCE HOURS**| The light source hours is the usage time of the light source.                                                                                                                                                  |
| **FILTER HOURS**      | The filter hours is the usage time of the air filter, counted after the last resetting. Pressing the **RESET** button on the remote control or the ► button of the projector displays a dialog. To reset the filter hours, select the **OK** using the ► button.  
  **CANCEL** ⇔ **OK**  
  • Please reset the filter hours only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.  
  • For the air filter cleaning, see the section “Cleaning and replacing the air filter” (93). |
| **FILTER MESSAGE**    | Use the ▲/▼ button to set the timer for notifying by the message when to replace the filter unit  
  After choosing an item except OFF, the message “REMINDER *** HRS PASSED ....” will appear after the timer reaches the interval time set by this feature (99).  
  When the OFF is chosen, the message will not appear. Utilize this feature to keep the air filter clean, setting the suitable time according to your environment of this projector.  
  • Please take care of the filter unit periodically, even if there is no message. If the air filter becomes to be blocked by dust or other matter, the internal temperature will rise, which could cause malfunction, or reduce the lifetime of the projector.  
  • Please be careful with the operating environment of the projector and the condition of the filter unit. |

<tbody>
<tr>
<td>STANDBY MODE</td>
<td>Using ▲/▼ buttons switches the standby mode setting. QUICK START: For quick start-up (Standby power increases). When the projector is set to QUICK START and in standby mode, <strong>POWER/STATUS</strong> indicator blinks in Green 2 times for about 3 seconds. QUICK START is disabled in 30 minutes and the mode switches to NORMAL standby. In this case, <strong>POWER/STATUS</strong> indicator lights in orange. Startup screen is not displayed when the projector is started in QUICK START. Fan operates while QUICK START is enabled. NORMAL: For using communication functions in the standby mode. NETWORK-WOL: For using Wake on LAN (WOL) function on wired network while reducing power consumption. POWER SAVE: Reduces power consumption minimally. • When NETWORK-WOL or POWER SAVE is selected, the following restrictions apply. - The RS-232C communication control except to turn the projector on are disabled while the projector is in the standby mode. If the COMMUNICATION TYPE in the COMMUNICATION menu is set to NETWORK BRIDGE, all of the RS-232C commands are disabled (82). - STANDBY OUTPUT is disabled. - The HDMI Link and HDBaseT™ functions are disabled while the projector is in the standby mode. - SCHEDULE function (Ex. POWER-ON) in the standby mode will not be operated. - It takes a while until the projector is available after starting up. • When NETWORK-WOL is selected, only Wake on LAN (WOL) on wired LAN is accepted while the projector is in the standby mode.</td>
</tr>
</tbody>
</table>

(continued on next page)
Wake-On LAN (WOL) function

If you select NETWORK-WOL in SETUP menu > STANDBY MODE, you can use the Wake-On LAN (WOL) function of wired network while saving power consumption in standby state.

Operation

Various communication functions can be used after the projector goes into NORMAL standby mode by receiving WOL Magic packet in standby state. However, the projector automatically goes back to NETWORK-WOL standby mode with less power consumption if 10 minutes have passed after the projector goes into NORMAL standby mode by WOL Magic packet. It takes about 1 minute on a wired network or about 2 minutes on a wireless network until communication functions are available after WOL Magic packet has been received.

WOL Magic packet

<tr>
<td>WOL Magic packet</td>
<td>A packet using MAC address of wired LAN of the projector (FF:FF:FF:FF:FF:FF(6 bytes)) followed by 102-byte data with MAC Address(6 bytes) repeated 16 times</td>
</tr>
</tbody>
</table>

NOTICE

Supported WOL Magic packet is a packet to be sent to broadcast address. General routers may not forward a packet of broadcast address to a device with a different network address by default. If you use a router like this, WOL function cannot be used for the projector that is not in the same network address. Consult with your network administrator about router settings. This function is available only in wired network and is not supported in wireless network.

## MENU PREFERENCES

From the MENU PREFERENCES, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item. Then perform it according to the following table.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| LANGUAGE        | Using the ▲/▼/◄/► buttons switches the OSD (On Screen Display) language. English ⇔ Français ⇔ Deutsch ⇔ Español  
                   ⬅️ ...... (shown in the LANGUAGE dialog) ....... ⬅️  
                   Press the ENTER or button to save the language setting. |
| MENU POSITION   | Using the ▲/▼/◄/► buttons adjusts the menu position. To quit the operation, press the MENU button on the remote control or keep no operation for about 10 seconds. |
| BLANK           | Using the ▲/▼ buttons switches the mode for the blank screen. The blank screen is a screen for the temporarily blanking feature (35). It is displayed by pressing the BLANK button on the remote control.  
                   My Screen ⇔ ORIGINAL ⇔ BLUE ⇔ WHITE ⇔ BLACK  
                   ⬅️  
                   My Screen : Screen can be registered by the My Screen item (66).  
                   ORIGINAL : Screen preset as the standard screen.  
                   BLUE, WHITE, BLACK : Plain screens in each color.  
                   • To avoid remaining as an afterimage, the My Screen or ORIGINAL screen will change to the plain black screen after several minutes. |
| AUTO BLANK      | Using the ▲/▼ buttons switches the mode for the AUTO BLANK screen.  
                   BLUE ⇔ WHITE ⇔ BLACK  
                   ⬅️  
                   • To avoid remaining as an afterimage, displayed image will change to the designated blank color screen by AUTO BLANK after several minutes in the following conditions.  
                   - When My Screen or ORIGINAL is displayed as BLANK screen.  
                   - When start-up screen is displayed. |

(continued on next page)
### START UP

Using the ▲/▼ buttons switches the mode for the start-up screen. The start-up screen is a screen displayed when no signal or an unsuitable signal is detected.

- **My Screen**: Screen can be registered by the My Screen item.
- **ORIGINAL**: Screen preset as the standard screen.
- **OFF**: Plain black screen.

- To avoid remaining as an afterimage, the My Screen or ORIGINAL screen will change to the AUTO BLANK screen after several minutes.
- When the ON is selected to the My Screen PASSWORD item in the SECURITY menu, the START UP is fixed to My Screen.

### My Screen

This item allows you to capture an image for use as a My Screen image which can be used as the BLANK screen and START UP screen. Display the image you want to capture before executing the following procedure.

Selecting this item displays a dialog titled “My Screen”. It will ask you if you start capturing an image from the current screen.

Please wait for the target image to be displayed, and press the ENTER or button to start registration.

To restore the screen and return to the previous dialog, press the RESET button on the remote control.

Registration may take several minutes.

When the registration is completed, the registered screen and the following message is displayed for several seconds:

**“My Screen registration is finished.”**

If the registration failed, the following message is displayed:

**“A capturing error has occurred. Please try again.”**

- This function cannot be selected when the ON is selected to the My Screen Lock item.
- This function cannot be selected when the ON is selected to the My Screen PASSWORD item in SECURITY menu.
- This function is unavailable for a signal from the LAN, HDMI 1, HDMI 2 or HDBaseT port.

### Closed Caption C.C.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Closed Caption C.C. is the function that displays a transcript or dialog of the audio portion of a video, files or other presentation or other relevant sounds. It is required to have NTSC format video or 480i@60 format component video source supporting Closed Caption C.C. feature to utilize this function. It may not work properly, depending on equipment or signal source. In this case, please turn off the Closed Caption.</td>
<td></td>
</tr>
</tbody>
</table>

#### DISPLAY

Select Closed Caption DISPLAY setting from the following options using the ▲/▼ buttons.

- **AUTO ↔ ON ↔ OFF**
  - **AUTO**: Closed Caption automatically appears when the input signal (Closed Caption C.C. compatible) from the port with the mute icon set at AUDIO SOURCE is selected.
  - **ON**: Closed Caption is on.
  - **OFF**: Closed Caption is off.

  - The caption is not displayed when the OSD menu is active.
  - The Closed Caption is the function to display the dialogue, narration, and / or sound effects of a television program or other video sources. The Closed Caption availability is depending upon broadcaster and/or content.

#### MODE

Select Closed Caption MODE setting from the following options using the ▲/▼ buttons.

- **CAPTIONS ↔ TEXT**
  - **CAPTIONS**: Displays Closed Caption.
  - **TEXT**: Displays Text data, which is for additional information such as news reports or a TV program guide. The information covers the entire screen. Not all of the Closed Caption C.C. program has Text information.

#### CHANNEL

Select Closed Caption CHANNEL from the following options using ▲/▼ buttons.

- **1 ↔ 2 ↔ 3 ↔ 4**
  - **1**: Channel 1, primary channel / language
  - **2**: Channel 2
  - **3**: Channel 3
  - **4**: Channel 4

The channel data may vary, depending on the content. Some channel might be used for secondary language or empty.
**OPTION menu**

From the OPTION menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item. Then perform it according to the following table.

<table>

| **DIRECT POWER ON** | Using the ▲/▼ buttons turns on/off the DIRECT POWER ON function.  

  **ON ⇔ OFF**  
  When set to the ON, the light source in projector will be automatically turned on without the usual procedure (22), only when the projector is supplied with the power after the power was cut while the light source was on.  
  • This function does not work as long as the power has been supplied to the projector while the light source is off.  
  • After turning the light source on by the DIRECT POWER ON function, if neither input nor operation is detected for about 20 minutes, the projector is turned off, even if the AUTO POWER OFF function (72) is disabled.  
  
  **WARNING** ▶ Be sure to confirm that the projector has been installed and connected safely even if it is turned on automatically. |
| **AUTO POWER ON** | When the projector is in the standby mode and detects the video signal input from external device, this function starts up the projector to display the image automatically on the screen. This function can be enabled by selecting an input referring to the displayed list.  
  • This function is unavailable when STANDBY MODE is set to NETWORK-WOL or POWER SAVE.  
  • This function may work unintentionally by connected external device.  
  
  **WARNING** ▶ When this function is enabled, the projector may turn on unintentionally by operating the device connected to it. Be sure not to put anything on or around the projector.  
  ▶ Be sure to confirm that the projector has been installed and connected safely even if it is turned on automatically. |

### SERVICE (continued)

#### KEY LOCK

1. Use the ▲/▼ buttons to choose the operations control.

   **CONTROL PANEL ➔ REMOTE CONTROL**

2. Use the ◄/► buttons to select ALL, ON or OFF.

   - **ALL ➔ ON ➔ OFF**

If you select ALL, all key functions are disabled.

Selecting ON in Step 2 locks the buttons except **STANDBY/ON** on the operations control selected in Step 1.

Selecting OFF releases the locked buttons on the operations control selected in Step 1.

- Please use this function to prevent tampering or accidental operation.
- It is not possible to disable both options at the same time.
- If you select ALL, the screen for setting a PIN code appears. Set it as follows.

1. Setting a PIN code
   1) When using the ◄/► button to select ALL, a confirmation message appears.
   2) Press the ► button to display the Enter Key Lock PIN Code box.
   3) Input a 4 part PIN code using the ▲/▼/◄/►, INPUT, or button.

   The Key Lock PIN Code again box will appear.

   Reenter the same PIN code. This will complete the PIN code registration.

   If there is no key input for about 55 seconds while the Enter Key Lock PIN Code box or the Key Lock PIN Code again box is displayed, the menu will close.

- Write down the PIN code so as not to forget it.

See the **Network Guide** for details of NETWORK operation. Remember that incorrect network settings on this projector may cause trouble on the network. Be sure to consult with your network administrator before connecting to an existing access point on your network.
**SECURITY menu**

This projector is equipped with security functions. From the SECURITY menu, items shown in the table below can be performed.

To use SECURITY menu: User registration is required before using the security functions.

**Enter to the SECURITY menu**

1. Press the ► button. The ENTER PASSWORD box will be displayed.
2. Use the ▲/▼/◄/► buttons to enter the registered password. The factory default password is as follows.

   ![Password](image)

   This password can be changed (below). Move the cursor to the right side of the ENTER PASSWORD box and press the ► button to display the SECURITY menu.
   - It is strongly recommended the factory default password to be changed as soon as possible.
   - If an incorrect password is input, the ENTER PASSWORD box will be displayed again. If incorrect password is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect password is input.

3. Items shown in the table below can be performed.

**If you have forgotten your password**

1. While the ENTER PASSWORD box is displayed, press and hold the RESET button on the remote control for about 3 seconds or press and hold the  button for 3 seconds while pressing the ► button on the projector.
2. The 10 digit Inquiring Code will be displayed. Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.
   - If there is no key input for about 55 seconds while the Inquiring Code is displayed, the menu will close. If necessary, repeat the process from (1).

| SECURITY PASSWORD CHANGE | (1) Use the ▲/▼ buttons on the SECURITY menu to select SECURITY PASSWORD CHANGE and press the ► button to display the ENTER NEW PASSWORD box.  
|                       | (2) Use the ▲/▼/◄/► buttons to enter the new password.                        |
|                       | (3) Move the cursor to the right side of the ENTER NEW PASSWORD box and press the ► button to display the NEW PASSWORD AGAIN box, enter the same password again. |
|                       | (4) Move the cursor to the right side of the NEW PASSWORD AGAIN box and press the ► button and the NOTE NEW PASSWORD box will be displayed for about 30 seconds, please make a note of the password during this time. Pressing the ENTER button on the remote control or ► button on the projector will close the NOTE NEW PASSWORD box. |

(continued on next page)
The My Screen PASSWORD function can be used to prohibit access to the My Screen function and prevent the currently registered My Screen image from being overwritten.

### 1 Turning on the My Screen PASSWORD

1-1 Use the ▲/▼ buttons on the SECURITY menu to select My Screen PASSWORD and press the ► button to display the My Screen PASSWORD on/off menu.

1-2 Use the ▲/▼ buttons on the My Screen PASSWORD on/off menu to select ON. The ENTER NEW PASSWORD box (small) will be displayed.

1-3 Use the ▲/▼/◄/► buttons to enter the password. Move the cursor to the right side of the ENTER NEW PASSWORD box (small) and press the ► button to display the NEW PASSWORD AGAIN box, enter the same PASSWORD again.

1-4 Move the cursor to the right side of the NEW PASSWORD AGAIN box and press the ► button to display the NOTE NEW PASSWORD box for about 30 seconds, please make a note of the password during this time.

Pressing the ENTER button on the remote control or the ► button on the projector will return to My Screen PASSWORD on/off menu.

When a password is set for My Screen:

- The My Screen registration function (and menu) will be unavailable.
- The My Screen Lock menu will be unavailable.
- The START UP setting will be locked on My Screen (and the menu will be unavailable).

Turning the My Screen PASSWORD off will allow normal operation of these functions.

- Please do not forget your My Screen PASSWORD.

### 2 Turning off the My Screen PASSWORD

2-1 Follow the procedure in 1-1 to display the My Screen PASSWORD on/off menu.

2-2 Select OFF to display the ENTER PASSWORD box (large). Enter the registered password and the screen will return to the My Screen PASSWORD on/off menu.

If an incorrect PASSWORD is input, the menu will close. If necessary, repeat the process from 2-1.

### 3 If you have forgotten your password

3-1 Follow the procedure in 1-1 to display the My Screen PASSWORD on/off menu.

3-2 Select OFF to display the ENTER PASSWORD box (large). The 10 digit Inquiring Code will be displayed inside the box.

3-3 Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.

</tbody>
</table>

1 Turning on the PIN LOCK
1-1 Use the ▲/▼ buttons on the SECURITY menu to select PIN LOCK and press the ► button or the ENTER button to display the PIN LOCK on/off menu.
1-2 Use the ▲/▼ buttons on the PIN LOCK on/off menu to select ON and the Enter PIN Code box will be displayed.
1-3 Input a 4 part PIN code using the ▲/▼/◄/►, INPUT or ENTER button.
  The PIN Code again box will appear.
  Reenter the same PIN code. This will complete the PIN code registration.
  • If there is no key input for about 55 seconds while the Enter PIN Code box or the PIN Code again box is displayed, the menu will close. If necessary, repeat the process from 1-1.

Afterwards, anytime the projector is restarted after AC power is turned off the Enter PIN Code box will be displayed. Enter the registered PIN code. The projector can be used after entering the registered PIN code. If an incorrect PIN code is input, the Enter PIN code box will be displayed again. If an incorrect PIN code is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect PIN code is input. The projector will also turn off if there is no key input for about 5 minutes while the Enter PIN code box is displayed.

This function will activate only when the projector is started after AC power is turned off.
  • Please do not forget your PIN code.

2 Turning off the PIN LOCK
2-1 Follow the procedure in 1-1 to display the PIN LOCK on/off menu.
2-2 Use the ▲/▼ buttons to select OFF and the Enter PIN Code box will be displayed.
  Enter the registered PIN code to turn the PIN LOCK function off.
  If an incorrect PIN code is input 3 times, the projector will turn off.

3 If you have forgotten your PIN code
3-1 While the Enter PIN code box is displayed, press and hold the RESET button for 3 seconds or press and hold the ▼ button for 3 seconds while pressing the ► button on the projector.
  The 10 digit Inquiring Code will be displayed.
  • If there is no key input for about 5 minutes while the Inquiring Code is displayed, the projector will turn off.
3-2 Contact your dealer with the 10 digit Inquiring Code. Your PIN code will be sent after your user registration information is confirmed.

| SECURITY INDICATOR | Selecting this item displays the SECURITY INDICATOR dialog. Use the ▲/▼ buttons to select ON or OFF.  
|                 | ON ⇔ OFF  
|                 | When ON is selected while PIN LOCK or TRANSITION DETECTOR is ON, it is notified by lighting/BLINKING of indicator in the standby mode (图 102). |
Cleaning and replacing the air filter

Check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible.

1. Turn the projector off, and unplug the power cord. Allow the projector to sufficiently cool down.

2. Use a vacuum cleaner on and around the filter cover.

3. Pick and pull up the filter cover knobs to take it off.

4. Press up slightly the bottom side knobs to unlock the bottom side of the air filter, and take it off.

5. Use a vacuum cleaner on both sides of the air filter while holding it so it will not be sucked in. If the air filter is damaged or heavily soiled, replace it with the new one. Request for an air filter with the following type number from your dealer when purchasing a new one.
   Type number: 003-006612-01

6. Use a vacuum cleaner for the filter vent of the projector.

7. Put back the air filter and filter cover into their place.

8. Turn the projector on and reset the filter hours using the FILTER HOURS item in the EASY MENU.
   (1) Press the **MENU** button to display a menu.
   (2) Point at the FILTER HOURS using the ▲/▼ buttons, then press the ► button. A dialog will appear.
   (3) Press the ► button to select “OK” on the dialog. It performs resetting the filter hours.
Cleaning and replacing the air filter (continued)

⚠️ WARNING ⚠️ Before taking care of the air filter, make sure the power cord is not plugged in, then allow the projector to cool sufficiently. Taking care of the air filter in a high temperature state of the projector could cause an electric shock, a burn or malfunction to the projector.
- Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.
- Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

NOTE • Replace the air filter when it is damaged or heavily soiled.
• Reset the filter hours only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.
• The projector may display the message such as “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.
Inserting or replacing the internal clock battery

This product has an internal clock. The battery for the internal clock is not contained at the time of factory shipment. When you use the function that requires the internal clock ("Event Scheduling" in the Network Guide), install a new battery according to the following procedure.

Use the following type of battery.

MAXELL, Part No. CR2032 or CR2032H

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. Turn the battery cover fully counterclockwise using a coin or the like, and pick the cover up to remove it.

3. Pry up the old battery using a flathead screwdriver or the like to take it out. Do not use any metal tools. While prying it up, put a finger lightly on the battery since it may pop out of the holder.

4. Insert the new battery or replace the battery with a new one.
   Slide the battery in under the plastic claw, and push it into the holder until it clicks.

5. Place the battery cover in place, then turn it clockwise using such as coins to fix.

⚠️ WARNING ⚠️ Always handle the batteries with care and use them only as directed. Battery may explode if mistreated. Do not recharge, disassemble or dispose of in fire. And also improper use may result in cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.

- Be sure to use only the batteries specified.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets. If swallowed, consult a physician immediately for emergency treatment.
- Do not short circuit or solder a battery.
- Do not allow a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing a battery.

NOTE • The internal battery is required to be replaced when the time is off soon after setting date and time.
**Other care**

**Inside of the projector**
To ensure the safe use of your projector, please have it cleaned and inspected by your dealer about once a year.

**Caring for the lens**
If the lens is flawed, soiled or fogged, it could cause deterioration of display quality. Please take care of the lens, being cautious of handling.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, wipe lightly the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.
   - Use commercially available lens tissue to clean the lens (used to clean cameras, eyeglasses, etc.).
   - If the lens is heavily soiled, wipe it with a cloth moistened with little water.
   - Never use polishing agents, detergents, chemicals, or solvents such as benzine or thinner.
   - Excepting for lens, use a soft cloth to clean. When excessively soiled, dilute a neutral detergent in water, wet and wring out the soft cloth.
Caring for the cabinet and remote control

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, wipe lightly with gauze or a soft cloth.
   If the projector is extremely dirty, dip soft cloth in water or a neutral cleaner diluted in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.

⚠️ **WARNING**  ► Before caring, make sure the power cord is not plugged in, and then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause a burn and/or malfunction to the projector.
   ► Never try to care for the inside of the projector personally. Doing it is so dangerous.
   ► Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector.
     • Do not put anything containing water, cleaners or chemicals near the projector.
     • Do not use aerosols or sprays.

⚠️ **CAUTION**  ► Please take right care of the projector according to the following. Incorrect care could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.
   ► Do not use cleaners or chemicals other than those specified in this manual.
   ► Do not polish or wipe with hard objects.

**NOTICE**  ► Do not directly touch the lens surface with hands.
Troubleshooting

If an abnormal operation should occur, stop using the projector immediately.

⚠️ **WARNING** ▶ Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer or service company.

Otherwise if a problem occurs with the projector, the following checks and measures are recommended before requesting repair. If this does not resolve the problem, please contact your dealer or service company. They will tell you what warranty condition is applied.

Related messages

| Blinking
In Red
2 times               | Blinking
In Red
1 ~ 4 times            | The interior portion has become heated.
Turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, confirm the following items, and then turn the power on again.
• Is there blockage of the air passage aperture?
• Is the air filter dirty?
• Does the peripheral temperature exceed 40°C?
• Is the setting for ALTITUDE appropriate?
• Is the exhaust air (hot/cold) from peripheral equipment blowing against the ventilation opening of projector?
For details on ALTITUDE, refer to ALTITUDE of SERVICE in the OPTION menu. If the projector is used with a wrong setting, it may cause damage to the projector itself or the parts inside. |
| Other than those above | Other error has occurred. Contact your dealer or service company. |

**NOTE** • When the interior portion has become overheated, for safety purposes, the projector is automatically shut down, and the indicator lamps may also be turned off. In such a case, disconnect the power cord, and wait at least 20 minutes. After the projector has sufficiently cooled down, turn the power on again.
## Troubleshooting

### Resetting all settings

When it is hard to correct some wrong settings, the FACTORY RESET function of SERVICE item in OPTION menu (84) can reset all settings (except settings such as STANDBY MODE, AUTO BLANK, LANGUAGE, LIGHT SOURCE HOURS, FILTER HOURS, FILTER MESSAGE, SECURITY, SCHEDULE, COMMUNICATION and NETWORK) to the factory default.

### Phenomena that may be easy to be mistaken for machine defects

About the phenomenon confused with a machine defect, check and cope with it according to the following table.

<table>
<thead>
<tr>
<th>Phenomenon</th>
<th>Cases not involving a machine defect</th>
<th>Reference page</th>
</tr>
</thead>
</table>
| Power does not come on. | **The electrical power cord is not plugged in.**
Correctly connect the power cord. | 17 |
|  | **The main power source has been interrupted during operation such as by a power outage (blackout), etc.**
Please disconnect the power plug from the power outlet, and allow the projector to cool down at least 20 minutes, then turn the power on again. | 17, 22 |
| Operations other than power on/off are not available. | **OSD MESSAGE is set to HIDE.**
Press the OSD MSG button on the remote control for more than 3 seconds to display the OSD MESSAGE dialog, then change the setting. | 26 |
| Neither sounds nor pictures are output. | **The signal cables are not correctly connected.**
Connect the connection cables correctly. | 10 ~ 15 |
|  | **Signal source does not correctly work.**
Set up the signal source device correctly by referring to the manual of the source device. | - |
|  | **The input changeover settings are mismatched.**
Select the input signal, and correct the settings. | 25 |
|  | **The BLANK function for pictures and the MUTE function for sounds are working.**
AV MUTE may be active.
Refer to the item “Sound does not come out” and “No pictures are displayed” on the next page to turn off the MUTE and BLANK functions. | 24, 35 |

  Connect the audio cables correctly.                                                                                                                               | 10 ~ 15        |
|                             | **The MUTE function is working.**
  Restore the sound pressing the VOLUME +/- button on the remote control.                                                                                             | 24             |
|                             | **The volume is adjusted to an extremely low level.**
  Adjust the volume to a higher level using the menu function or the remote control.                                                                                 | 24, 64         |
|                             | **The AUDIO SOURCE/SPEAKER setting is not correct.**
  Set the AUDIO SOURCE/SPEAKER in AUDIO menu correctly.                                                                                                              | 64             |
|                             | **The Sound checkbox is unchecked.**
  If you have selected LAN, put a check mark on the Sound checkbox in the Option menu of “LiveViewer”.                                                            | –              |

</table>
| Schedule function does not work. | **The POWER SAVE/NETWORK-WOL function is working.**  
Select NORMAL or QUICK START for STANDBY MODE item in the SETUP menu. | 61 |
| | **The internal clock has been reset.**  
When you do not install the battery, once you turn off the projector in the POWER SAVE/NETWORK-WOL mode or the AC power, the current date and time setting is reset. Check the DATE AND TIME setting in OPTION-SCHEDULE. | - |
| When the projector is connected to wired LAN, it powers off and on as described below.  
Powers off  
POWER/STATUS indicator blinks in orange a few times  
 Goes into standby mode | **Disconnect the LAN cable and check that the projector is working properly.**  
If this phenomenon occurs after connecting to the network, there may be a loop between two Ethernet switching hubs within the network, as explained below.  
- There are two or more Ethernet switching hubs in a network.  
- Two of the hubs are doubly connected by LAN cables.  
- This double connection forms a loop between the two hubs.  
Such a loop may have an adverse effect on the projector as well as the other network devices.  
Check the network connection and remove the loop by disconnecting the LAN cables such that there is only one connecting cable between two hubs. | - |

**NOTE**  
- Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and it does not constitute or imply a machine defect.
End User License Agreement for the Product Software

- Software in the projector consists of the plural number of independent software modules and there exist our copyright and/or third party copyrights for each of such software modules.
- Be sure to read “End User License Agreement for the Product Software” which is separated document.
