This document provides update instructions and describes known and fixed issues in the E600 wall controller firmware version 1.2.4.0 for Christie Velvet LED display systems.

### Affected products

The following products are affected.

- Christie Velvet LED display systems using the E600 wall controller.

### Fixed issues

The following issue has been fixed in this software release.

- Added support for HDCP 2.2

### Upgrading the firmware on the

When a new version of the software is released, the must be upgraded.

1. Download the firmware file to a computer that will be connected to the controller for the upgrade, or to a USB key.
2. Unzip the downloaded firmware file.
3. Connect an HDMI or Ethernet cable between the computer running the controller software and the controller.
4. Launch the software and log in as the administrator.
  - a) Click **User > Advanced User Login**.
  - b) Login with the password **admin**.
5. In the blank area beside the Monitoring icon, right-click and type **666888**.
6. In the Program Path area, browse to the location of the unzipped download, and select the firmware upgrade folder.
7. Click **Update**.
8. In the confirmation message, click **Yes**.

As the firmware upgrade is installed, the controller screen and controller software both display a progress indicator.

After the upgrade is complete, the controller reboots.
9. To verify the upgrade was successful, in the top left corner of the controller display verify the version number displayed is 1.0.5.9.
