
Software Release Notes

FE600 Version 1.1.0.0

This document provides the changes from FE600 version 1.0.2.0 to FE600 version 1.1.0.0.

Affected products

The following products are affected:

- Christie Velvet LED display systems using the FE600 fiber converter.

Purpose of release

The following issue has been fixed in this firmware release.

- Fixed the issue where some devices using FE600 flashed the screen.

Upgrading the firmware on the controller software system

When a new version of the firmware is released, it must be upgraded.

1. Download the firmware file to a computer connected to the converter for the upgrade or to a USB key.
2. Unzip the downloaded firmware file.
3. Connect a USB cable between the computer running the controller software and the converter.
4. Launch the software and log in as the administrator.
 - a. Select **User > Advanced User Login**.
 - b. Login with the password `admin`.
5. In the blank area beside the Monitoring icon, right-click and enter `666888`.
6. In the Program Path area, browse to the location of the unzipped download and select the firmware upgrade folder.
7. Select **Update**.
8. In the confirmation message, select **Yes**.

As the firmware upgrade is installed, the controller software display a progress indicator. When the upgrade is complete, the convert reboots.

9. To verify the upgrade was successful, select **Refresh**.

If the FE600 firmware version is displayed as 1.1.0.0, the update was successful.
