
Software Release Notes

E600 Version 1.2.6.7.CTM0101.ST1

This document provides the changes from E600 version 1.2.6.6 to E600 version 1.2.6.7.CTM0101.ST1.

Affected products

The following products are affected:

- Christie Velvet LED display systems using the E600 wall controller.

Purpose of release

The following issue has been fixed in this firmware release.

- Solved an issue with using the dehumidification function under the new version of the software.
- Fixed an issue with rcfgx files being sent using the LCD panel.
- Fixed a missing display on the peak brightness lever on the far right of the screen.
- Fixed the resolution recognition compatibility issue between the A1000 graphics card and E600.

Upgrading the firmware on the controller software system

When a new version of the firmware is released, it must be upgraded.

1. Download the firmware file to a computer that will be connected to the controller for the upgrade or to a USB key.
2. Unzip the downloaded firmware file.
3. Connect an Ethernet cable between the computer running the controller software and the controller.
4. Launch the software and log in as the administrator.
 - a. Select **User > Advanced User Login**.
 - b. Login with the password `admin`.
5. In the blank area beside the Monitoring icon, right-click and enter `666888`.
6. In the Program Path area, browse to the location of the unzipped download and select the firmware upgrade folder.
7. Select **Update**.
8. In the confirmation message, select **Yes**.

As the firmware upgrade is installed, the controller software display a progress indicator. When the upgrade is complete, the convert reboots.

9. To verify the upgrade was successful, navigate to **PDS > Advanced Settings**.

Scroll to the last item which was displayed as V1.2.6.7.
