
Software Release Notes

H Series v1.2.0

This document describes the changes from H Series version 1.0.0 or 1.1.0 to 1.2.0.

Affected products

- Christie D12WU-H
- Christie D12WU-H

Purpose of v1.2.0 release

- Resolves inconsistent frame rate output with 50 Hz signals (interlaced and progressive).

Previous software changes from version 1.0.0 to 1.1.0

- Enables 3D functionality.
- Added support for manual, auto blending, and warping applications.
- Modified filter placement issues (projector does not shut down, warning can be removed from on-screen display).
- Fixed image artifacts related to signals when using picture-in-picture.

Installation

1. To upgrade the H Series firmware, run
001-113047-01-Christie SFW-H_Series_v1_2_OPFU(V07.65).7zC
2. The installation time will vary depending on which software version is being upgraded.
Upgrading from software version 1.0.0 to 1.2.0 takes approximately 2.5 hours.
Upgrading from Software version 1.1.0 to 1.2.0 takes approximately 5 minutes.
