
Software Release Notes

HS Series 2K version 1.6.0

This document describes the changes from HS Series 2K version 1.5.0 and D13HD2/D13WU2 version 1.0.3 to version 1.6.0.

If your projector has a firmware version older than version 1.5.0/v1.0.3, after updating the firmware, perform both a factory and network reset. For more information regarding the reset, contact Christie Technical Support.

Affected products

The following products are affected:

- D13HD2-HS
- D13WU2-HS
- D16HD-HS
- D16WU-HS
- D20HD-HS
- D20WU-HS
- DWU1612-HS
- DWU2022-HS

Purpose of release

The primary purpose of this software release is:

- Added sub image adjustment commands for color space, brightness, and contrast.
- Added the Service page to the web interface.
- Added the HSG test pattern to the web interface.
- Added the 13 Points test pattern to the Service menu.
- Improved the input sync time.
- Added TEC and pump information to the Service menu.
- Improved compatibility for iMac and MacBook.
- Made Twist Link available for DWU2022-HS and DWU1612-HS.
- Provided the family subtype ID for Twist.
- Provided minor fixes and improvements over version .

Known issues

This release of HS Series 2K contains the following known issues:

- When using an existing configuration on Christie Twist/Mystique and you are prompted to clear the test patterns, the projector may clear the test pattern regardless of the given response.
- The side panel controls for focus adjustment do not work if an internal test pattern is displayed.
