Software Release Notes

4K40-RGB version 1.3.3
This document provides the changes from 4K40-RGB version 1.3.2 to 4K40-RGB 1.3.3.

Affected products
The following products are affected:
- D4K40-RGB
- Mirage 4K40-RGB

Purpose of release
The primary purpose of this release is the following:
- Changed the softstart time to one second.

Notes
Note the following about version 1.3.3:
- Upgrading a projector from a USB requires the software package be located in the root folder of the USB flash drive and the drive be formatted using a FAT based file system.
- After the upgrade is complete, if you see an issue with the thumbnail display on the web user interface, clear the web browser cache.
- Upgrading from 4K40-RGB v1.2.1 or older to a newer version invalidates the existing service web user interface login; instead, use user as the username and user as the password. To change the default password, use MENU > Admin > Remote Password feature.

Known issues
This release of 4K40-RGB contains the following known issues:
- MENU > Configuration > Light & Output Settings > Master Laser Power is only available when LiteLOC™ 2.0 is enabled.
  To enable LiteLOC™ 2.0, calibration data must be entered in the projector.
- Changing the network configuration from Static IP to DHCP while the DHCP server is unavailable or the cable is unplugged causes the software to become unresponsive for approximately 90 seconds.
