## Griffyn Series version 1.3.2

This document provides the changes from Griffyn Series version 1.3.1 to Griffyn Series 1.3.2.

### Affected products

The following products are affected.

- Griffyn Series

### Purpose of release

The primary purpose of this release is to provide the following new features and updates:

- Added support for the CS12G0 board update.
- Added the 3D Darktime Status item to the Signal Group in the Status System.
- Added XYZ to the Color Space Selection list.
- Added better 3D performance with 50Hz frame doubled content (100Hz).
- Fixed issued an issue where LiteLOC™ was not reachable when operating in Limited Brightness mode without low-line calibration.

### Known issues

This release of Griffyn Series contains the following known issues:

- When using Christie View with DisplayPort in stereo mode, the left eye displays input 1 and 3 and the right eye input 2 and 4.  
*Workaround:* Adapt the Christie View setup to respond correctly to the left/right signal.
- Frame tearing may be present when the Mirage Pro feature of Christie View/MPOV is active. This will be addressed with a future update.  
*Workaround:* Increase the Frame Delay setting to correct the problem.
- LiteLOC™ performance is compromised when running at low brightness levels (30 to 50%). Christie does not recommend brightness levels at 30% or lower as laser devices may shut down and colors may drop out.  
*Workaround:* Raise brightness.

### Technical support

Technical support for Christie Enterprise products is available at:

- North and South America: +1-800-221-8025 or [Support.Americas@christiedigital.com](mailto:Support.Americas@christiedigital.com)
- Europe, Middle East, and Africa: +44 (0) 1189 778111 or [Support.EMEA@christiedigital.com](mailto:Support.EMEA@christiedigital.com)
- Asia Pacific ([support.apac@christiedigital.com](mailto:support.apac@christiedigital.com)):
