Purpose of release

The primary purpose of this software release is:

- Added new shutter settings features to enhance the smoothness: Fade In and Fade Out.
- Added a customized EDID feature.
- Added size presets for a 21:9 aspect ratio to support 21:9 resolution.
- Fixed issues where items were being greyed out in the web user interface.
- Fixed issues with the Reset Image Settings feature.
- Made the following fixes:
 - Projectors with the latest v1.6.0 software installed did not work correctly with the older .36 ultra-short throw lens.
 - For Twist and Mystique, after uploading an image in POST, an image (PRE) could not be immediately uploaded while the original image was displayed.
 - After the test pattern was opened and then exited, the projector could not search for the signal source.
 - After doing the lens calibration, the location was saved in a location that could not be executed.
 - The Christie blue splash screen flashed black when being added to Mystique.
 - Finishing the Auto Wall Color function, Picture mode did not switch to User or Save to User modes
