
Software Release Notes

Jazz Series WUXGA version 1.1.0

This document describes the changes from Jazz Series WUXGA version 1.0.0 to version 1.1.0.

Affected products

The following products are affected:

- DWU1800(A)-JS
- DWU2400(A)-JS

Purpose of release

The primary purpose of this software release is to fix the following issues:

- Added various features to the web user interface.
- Improved the on-screen display.
- Modified the factory reset options.
- Adjusted the ambient temperature overheating threshold to 50°C (122°F).
- Optimized the lens detection process to improve the lens information reading speed.
- Modified the process for 3D mode changes and resync to verify the current picture mode.
- Modified the black output behavior when the Low Latency function is changed.
- Modified the hue, saturation, and gain (HSG) reset to default to clearing settings.
- Modified the `ATF`, `ACC`, and `CLI` serial commands for grouping functionality.
- Provided minor fixes and improvements over version 1.0.0.
