## Sapphire® 4K40-RGBH version 1.0.1

This document provides the changes from Sapphire® 4K40-RGBH version 1.0.0 to Sapphire® 4K40-RGBH version 1.0.1.

### Affected products

The following products are affected:

- Sapphire® 4K40-RGBH

### Purpose of release

The primary purpose of this release is to provide the following new features and updates:

- Added a new LiteLoc™ calibration method.  
Sapphire® 4K40-RGBH version 1.0.1 requires a re-calibration of LiteLoc™ because installing version 1.0.1 removes the previous calibration. To do sensor-to-screen calibration, use Hawkeye version 1.5.1 or later along with Sapphire® 4K40-RGBH 1.0.1.  
Brightness is capped at 75% in this release.
- Added Electrostatic discharge (ESD) mitigation.

### Planned feature availability

The following features will be available in future releases.

- Release 1.1.0:
  - 100% brightness (in version 1.0.x, maximum brightness is 75%)  
Note the following:
    - LiteLOC™ re-calibration is not required from version 1.0.1 or later.
    - LiteLOC™ re-calibration is required if the projector was on version 1.0.0.
  - Laser phosphor governor

### Known issues

The following are known issues in this release:

- If network settings are set to DHCP and no DHCP server is connected to the projector does not detect video from SDVoE sources.  
*Workaround:* Connect a DHCP server to the projector or set the projector IP to a static IP outside of the 169.254.xxx.xxx subnet.

## Technical support

Technical support for Christie Enterprise products is available at:

- North and South America: +1-800-221-8025 or *Support.Americas@christiedigital.com*
- Europe, Middle East, and Africa: +44 (0) 1189 778111 or *Support.EMEA@christiedigital.com*
- Asia Pacific (*support.apac@christiedigital.com*):
  - Australia: +61 (0)7 3624 4888 or *tech-Australia@christiedigital.com*
  - China: +86 10 6561 0240 or *tech-supportChina@christiedigital.com*
