J Series HP AC power connector installation

The J Series projectors have a locking pin to prevent inadvertent disconnection.

The locking pin has three holes to accommodate different power cord connector thicknesses.

When connecting AC power, make sure the locking pin for the AC plug is inserted in the appropriate hole to make the connection as tight as possible towards the projector. Failure to use the proper locking location may result in damaged connectors on the projector and power cord or inadvertent loss of AC power.

Affected products

The following products are affected:

- Roadster HD20K-J
- Roadster WU20K-J
- Roadster S+22K-J
- Mirage HD20K-J
- Mirage WU20K-J
