Environments with higher than normal contaminant levels

This bulletin provides clarification for maintenance schedules. Preventative maintenance is an important part of the continued and proper operation of your product. Failure to perform maintenance as required, and in accordance with the maintenance schedule specified by Christie, voids the warranty. In environments where dust, smog, dirt, and other contaminants are prevalent, Christie strongly recommends performing more frequent maintenance than your maintenance schedule indicates. All maintenance services must be performed by Christie accredited service technicians.

Affected products

The following products are affected.

- All Christie products
