

Christie MicroTiles - Designed for exceptional performance

Since the launch of Christie® MicroTiles®, designers have used these digital canvases to create stunning tiled display walls in any size and shape – an unprecedented revolution in digital video wall technology. Christie MicroTiles remain unique and unmatched in the industry, with close to 1,000 installations at many high profile organizations around the world.

With upgrades and enhancements based on industry feedback over time, Christie MicroTiles offer even stronger and enduring performance.

Christie MicroTiles enhancements:

- **Screens** are now manufactured with the latest diffusion materials to offer high brightness and wide viewing angles. Additionally, S310 screen seams have been reduced to 0.7 mm for near-seamlessness in a tiled display.
- **New lens materials** provide superior reliability under demanding conditions
- **Digital Micromirror Devices (DMDs)** have an enhanced seal to safe-guard against humidity
- **Modified connection points** make it easier to fine-tune the alignment of tiles
- **Firmware** includes automatic notification of system warnings and events
- **Factory calibration advancements** ensure the best possible color matching between tiles

Backed with confidence

To demonstrate our confidence in the performance of our Christie MicroTiles, we are increasing the warranty from 2 to 3 years for qualified installations, effective January 1, 2015.
