Christie

Mystique

Spectacular experiences.
Simple solutions.

A full suite of services, software and hardware, Christie® Mystique™ provides complete, integrated solutions that remove the technological complexities and constraints associated with the creation of the most imaginative, exhilarating and memorable visual experiences.

Complete solutions
Creating complex, visual experiences, such as theme park attractions, sports-venue projection mapping and dome theaters, can be costly, time consuming and difficult. The technical logistics required to successfully pull it off are intense.

Christie Mystique makes it simpler to create these types of spectacular large-scale visual experiences by applying our expertise, knowledge and technology to support the design, installation and operation of complex projection systems.

Design. Install. Operate.
Built on the pillars of Design, Install and Operate, each facet of Christie Mystique solves specific challenges encountered when fulfilling complex multi-screen, multi-projector blended systems.

CHRISTIE®
MYSTIQUE

Christie Mystique Design

Mystique Design is the first step in creating next-generation visual experiences. Combining sophisticated software tools and the knowledge and expertise of our team, Mystique Design helps integrators and clients design, validate, simulate and visualize complex projection systems.

› Through close collaboration with clients and integrators, Mystique Design helps move the project from concept to complete system design and validation

› Where system designs are already complete, we provide validation to ensure the system meets performance specifications

› Using 3D scaled models and state-of-the-art projection technology, virtual reality headsets and other tools, Mystique Design offers new ways to "see" the system and experience it through simulation and visualization before purchasing and installing product

Christie Mystique Install

As a visual system scales in scope and complexity, so do the challenges associated with integrating it. Mystique Install comprises software tools and services to successfully stage, install, calibrate and maintain complex, multi-projector displays, including projector stacking.

› Mystique Install software tools provide accurate and efficient camera-based alignment, warping and blending

› Our technical experts support you through the install, setup and calibration of the entire system

› Supports any screen type and any number of projector channels

› Supports 3D projection mapping on buildings, landmarks and objects

› Includes Christie Guardian, a powerful optional feature that constantly monitors a blended projection system for any misalignment. If Guardian does detect a misalignment, it automatically calibrates the image in real-time, quickly, invisibly, and without interruption, even when content is playing so audiences are unaware of any problem

› Available in single-camera and multi-camera packages that are customized to the specific application and screen shape

› Compatible with any media server or playback device when used with Christie 3DLP® projectors

› Compatible with any projector[1] when used with Christie Pandoras Box

Christie Mystique Operate

Maintaining show quality day after day is paramount. With Mystique Operate, we provide integrated software tools and system-level monitoring capabilities to ensure the overall system quality is maintained over its lifetime.

› Quick realignment of the projection systems ensuring the highest show quality

› Comprehensive monitoring and reporting of the system's operational health to keep you informed and aware of maintenance requirements

› Integrated notifications and alerts based on your customized parameters
