You bring the vision, we bring the tech

What’s the advantage of working with Christie®? We listen.

Bring us your big, your bold, your impossible ideas. Through committed collaboration, we’ll work together to create a display solution that not only brings your vision to life in amazing detail, but also works flawlessly day in, day out, show after show. Rest easy knowing you’ll benefit from maximum uptime while your audiences are completely immersed in the experience.
A BASTION OF INNOVATION

Our engineering teams are the best in the business. We hold over 150 patents and have achieved more than 50 industry firsts. Christie® technologies empower our partners to imagine and create truly one-of-a-kind experiences that are not possible with any other manufacturer.

Technology highlights

Setting benchmarks in a variety of performance metrics, Christie® display technologies are the preferred choice for complex and demanding entertainment applications.

High frame rates (HFR) – From 120 up to an astounding 480fps, producing ultra-smooth, blur-free and more immersive video content.

Proprietary RGB pure laser illumination – Long-lasting, stable and high-performance illumination technology that achieves >90% of the Rec. 2020 color space.

Patented TruLife™ electronics – Unmatched electronics platform that supports a video-processing pipeline of up to 1.2 Gigapixels per second (GPix/s).

Mystique™ – Automated camera-based alignment software for multi-projector arrays and 2D and 3D projection mapping experiences.

Guardian – Unique to Christie, Guardian provides invisible, real-time auto-alignment for blended displays.

Terra – Standardized AV-over-IP networking enabling the transport, processing and control of audiovisual content, including 4K@60Hz video formats, over 10G Ethernet networks.

View – Innovative projection system feature that allows up to four users to view different content on the same screen at the same time.

The 120th birthday of the Eiffel Tower included breathtaking pyrotechnics and epic video projection.
